

Custom Development in SharePoint 2010

Event Highlights

Do you have a custom web application that you are thinking of building? Have you heard you can build it in SharePoint 2010? Are you thinking of moving your custom application from MOSS 2007 to SharePoint 2010? Do you have questions on how to do it, how it will function?

Among topics to be covered:

- Visual Studio 2010
- SharePoint Designer 2010 vs 2007
- Developed Master Page (Differences between 2007 and 2010)
- Develop a Visual Web Part
- Develop a Silverlight Web Part
- User Interface Development - Designer Friendly
- Deployment - Farm Configuration for Hosting Enterprise Application (Deploying Content)
- Equipment needs for developers
- Empower Content Editors and End Users to design pages
- Question and Answer Session

Speaker:

Sai Naik (West Michigan Local, SharePoint Architect, Manager Consultant) and Dave Truxall (.Net Architect and application lead, Manager Consultant) of Sogeti USA will share their experiences on developing a custom application on the SharePoint 2010 platform. Sai and Dave worked in multiple projects involved custom development in SharePoint 2007 and 2010. They will now share tips, insights, and perspectives that will help save development time, leverage SharePoint systems to help facilitate content creation, and create a custom application built on the SharePoint Platform.

Recommended Audiences:

Business Executives, CIO, Business Managers, Business Owner, Business Decision Maker.

Following the event there will be a short after hour's session at Tavern on Kraft. You will be able to mingle with Sai and Dave to discuss SharePoint, or other topics of conversation.

Date: Thursday March 03rd, 2010

Time: 4:30 - 6:00

Address

5315 28th St. Court SE
Suite B
Grand Rapids, MI 49546
